TECHNICAL SKILLS

Systems & Hardware: Windows installation and configuration, Arch Linux, WSL, PC assembly, BIOS updates

Package Managers: winget, Scoop, pacman

Web & Tools: WordPress, Prismic, REST APIs, Postman, Insomnia, Git, GitHub, Vercel, Coolify

Development: PostgreSQL, SQLite, SQL, JavaScript, TypeScript, HTML, CSS, GitHub Actions, Playwright

EXPERIENCE

Praxis Loop

2025–Present

Full Stack Developer

- Investigate production website issues by reproducing bugs and checking CMS content and configuration.
- Wrote scripts to migrate 3,500 pages on mohmuseum.org from WordPress to Prismic.
- Meet weekly with clients to review website issues, clarify requested changes, and discuss migration progress.
- Built automated visual checks with Playwright and GitHub Actions to detect unintended changes to page layouts.

Lookout

2022–2023

Production Designer

- Produced marketing and conference assets, incorporating feedback from design and marketing teams.
- Brought motion graphics production in-house for recurring animated campaign assets.
- Created a reusable library of background graphics for marketing materials.

Reflex

2021–Present

Badminton Head Coach

- Organize practice groups and rotations to balance individual coaching with keeping the rest of the class engaged.
- Break complex techniques into manageable steps, using clear explanations to guide students.
- Assess students' progress during class and adjust the pace or activity to address difficulties and maintain participation.

PROJECTS & PERSONAL TECHNICAL EXPERIENCE

Windows & PC Hardware

Personal desktops and laptops

- Assembled a gaming desktop PC and installed Windows on multiple personal desktops and laptops.
- Configured and updated system BIOS.
- Installed applications using winget and Scoop.
- Customized Windows registry settings by following technical guides.

Arch Linux

Personal development laptop

- Tried Ubuntu, Fedora, and Zorin before choosing Arch for an aging laptop with battery and performance issues.
- Installed Arch using its documentation, managed packages with pacman, and tested Hyprland and Niri.
- Maintained the system through package updates and cleanup of unused software and leftover configuration files.

MineCentral

Next.js, Stripe, Coolify | minecentral.net

- Built and maintained a Minecraft server hosting platform using Next.js and self-hosted server management tools.
- Connected Stripe subscriptions with server provisioning and a dashboard for billing and instance monitoring.

EDUCATION

Columbia University

2024

Full Stack Web Development Bootcamp

The New School

2023

Bachelor of Fine Arts in Communication Design
