Brooklyn, NY | (669) 238-6417 | hugohsidev@gmail.com | linkedin.com/in/hugo-hsi | hugohsi.dev

SUMMARY

Full-stack developer with production web experience across CMS migrations, client support, REST API debugging, CI/CD, and Linux-based deployments. Comfortable tracing issues through frontend, CMS, API, and database layers.

TECHNICAL SKILLS

Support: Production issue triage, customer support tickets, client communication, technical documentation, CMS/editor support, REST API debugging, Postman, Insomnia

Deployment: Web applications, Next.js, SvelteKit, React, Node.js, Prismic CMS, WordPress, Vercel, Dokploy, Coolify, GitHub Actions, Playwright

Databases: PostgreSQL, SQLite, SQL queries, relational data modeling

Systems/Languages: Windows, WSL, Arch Linux, Linux VPS environments, Git, GitHub, TypeScript, JavaScript, SQL, HTML, CSS

EXPERIENCE

Praxis Loop

Oct. 2025 – Present

Full Stack Developer (Contractor)

- Support client-facing production web applications by triaging editor issues, reproducing bugs, checking CMS data/configuration, and escalating implementation work.
- Meet weekly with client stakeholders to clarify requirements, explain tradeoffs, review production issues, and keep migration work aligned with business needs.
- Migrated mohmuseum.org from WordPress to Prismic CMS across 3,500+ pages, building editor-friendly content models that reduced reliance on paid development for routine updates.
- Created internal CMS documentation and editor workflows to help non-technical users publish content and avoid recurring support requests.
- Built visual regression testing with Playwright and GitHub Actions to catch UI regressions during deployment and reduce manual QA effort.

Lookout

2022 – 2023

Design Production Intern

- Produced marketing and conference assets in a fast-moving security software environment, coordinating feedback across design, marketing, and stakeholder groups.
- Brought motion graphics production in-house, reducing dependency on outside agencies for recurring animated campaign assets.
- Created reusable background asset library for marketing teams, improving consistency and reducing repeated production work.

PROJECTS

MineCentral, Next.js, Stripe, Coolify, Linux VPS, minecentral.net

- Built and maintained Minecraft server hosting platform using Next.js, Stripe subscriptions, Coolify on a VPS, and self-hosted server management tools.
- Integrated subscription and provisioning workflows so users could start hosting, manage billing, and monitor instances from dashboard.
- Used Linux VPS administration to deploy, configure, and maintain application services without relying on fully managed hosting.
- Troubleshoot platform issues across web application behavior, payment flows, deployment configuration, and hosted server access.

Me Save Money, SvelteKit, PostgreSQL, TypeScript

- Built budgeting PWA with SvelteKit and PostgreSQL to track purchases, set weekly budgets, and show remaining spend in real time.
- Implemented type-safe server/client RPC using Svelte experimental remote functions, improving reliability of client-to-backend data flow.

EDUCATION

Columbia University

May 2024

Full Stack Web Development Bootcamp

The New School

May 2023

Bachelor of Fine Arts in Communication Design
